

# **PROJECT INFORMATION SURVEY**

## **Muddy Creek Watershed Conservation Plan (WCP)**

The object of the Project Information Survey is to collect information on the watershed. With that goal in mind, we are asking watershed stakeholders and residents to identify sources of information about the watershed. Sources of information can include, but not be limited to: comprehensive plans, zoning/land use ordinances, stormwater management ordinances, restoration projects, assessment data, problem areas, areas of concern, unique areas, and other project information. The goal is to collect as much information as possible about the watershed so that we can make informed decisions regarding the management plan.
